BICYCLES AND CITY TRANSPORT

Public transports are vehicles of collective transport. One difference between private transport and public transport ^{is} that travelers in public transport have to adapt to established times and to the routes of the operator. The main public transports are: buses, taxis, trains, streetcars...

Public transport can be provided for one or many private companies. This service ~~to~~ the citizen ~~of~~ pays directly when we enter to any type of public transport.

Bicycle is a personal vehicle (or public: "Servici") in which the traveler is the own driver. Their basic components are: two wheels of the same size, two pedals, a saddle and the chain that makes turn to the pine kernel.

ADVANTAJES OF PUBLIC TRANSPORT:

- Public transports consume less energy than private ones and contaminate less (exempting the planes.)
- A bus can take an average of 50 persons, instead, a car can only take 4 persons.
- Public transports possess private rails, so they don't suffer problems of clogging.
- Using this type of transport carries a minor expense than private ones and you save time, so the parking is not a problem.
- With only 200.000 persons changed the car into the bus, would save more than 500 millions of fuel and would avoid the emission of many millions of carbon dioxide.
- You can relate to other person if you are inside in to a public transport.

ADVANTAJES OF BICYCLES:

- It neither contaminates or damages to the environment.
- It helps you to do sport, gives you happiness and you forget the problems when you are riding a bike.
- There is an exclusive rail for bicycles distributed for all the city. → where?
- Hardly ever there is traffic. Are you sure?
- You can walk for sites where a car or any vehicle never could (narrow streets, in the center...)
- Although the bicycle is of particular use, many times you can take one person with you on the pousfeets or on the handlebar.

→ dangerous and forbidden.

DISADVANTAGES OF PUBLIC TRANSPORT:

- You can't take a lot of baggage.
- In many public transports like buses, you can't eat inside.
- You can't enter with animals, unless you are blind (in this case is necessary to take a special dog.)
- In many cases, some persons that are inside on a public transport are not adorned and they smell badly.
- When there are too people in the same public transport, you can feel oppressed because you are very near to the other persons.
- You have to adapt to the Schedule that many different public transport have.
- Many public transports like the bus, go too slow because the driver have to stop in all the stops for people go up and down, if you have hurry, you will be late.

DISADVANTAGES OF BICYCLES:

- If you are not a good driver, you could have an accident.
- The 16 year old minors have to put on a hull, or the police will fine you.
- Sometimes, taking someone with you can be dangerous because both could fall down.
- If an old person or a young boy crosses suddenly, you could knock down them.
- Bicycle are a private transport very difficult to take things.

Enumeration

OPINION:

We think that we prefer use a public transport for moving on the streets of our town, but we prefer a particular or private vehicle to do a long journey.

We love bicycles, we use them two or three times per week. It help us to go places on a confort way and quickly.
